I love working with high school students! They are in a place in their educational journey where they are beginning to understand life and beginning to take responsibility for it. Here at Vista we are able to work with students individually and meet them where they are at academically and emotionally. They have a lot to offer to our community. It is awesome to see them transition to adulthood and begin a new journey in college or the workforce.

BA in Business
MA Degree in Educational Leadership
Career and Technical Certification

Vista Charter School offers a work-study program for its students. Students can receive credit for working or volunteering. We believe the education you receive from you work experience is valuable; as is the education you receive in the classroom. At a work site, you learn many work skills such as lessons is responsibility, team-building skills, and work ethic. As Work Study Coordinator/Career Teacher, I assist students in finding jobs, preparing resumes, developing job skills and determining a career path. In our Career Planning class, we assist students with answering two questions: 1) What is it I want to do after high school? and 2) what do I need to do to make that happen?

Our goal is to prepare our student to enter college with a clear vision of a career, and prepare our student for the workforce with an above average vocational background in place.
